General Electric Advances.

The General Electric shares again advanced slightly, and the rise of 6 points in the price of the stock during the week is now connected with stories, all of them Pac unconfirmed, that "rights" upon the stock in some form or other may be shared by To stockholders in the near future.

The Atchison Rallway Company report- U. ed for October an increase in gross earnings of \$487,000, reduced to an increase of \$223,000 in net. This was a gratifying improvement over previous monthly reports

A considerable fall took place in the wheat market. The weekly bank statement for once was clearly logical and ex-plainable. An "average" increase in loans of \$12,907,000, and an "actual" in-crease of \$17,333,000 were shown.

Other Loan, Decrease.

The loans in the statement of other banks, that is to say institutions outside of the clearing house, decreased \$12,944,000. The lower prices for call and time money during the week, wherefore, resulted as was expected and prophesied in a shifting of loans from the trust companies and private lenders to the clearing-house

As the cash held by the banks increased the average cash reserve was enlarged by about \$496,000. But the larger proportion of increase in loans in the "actual" state-ment accompanied with a smaller ensurplus reserve in this return of \$2,021,000.

COTTON MARKET.

Quotations furnished by W. B. Hibbs & Co., aembers of the New York Stock Exchange, Hibbs uilding. New York, Nov. 26.—The market continued active New York, Nov. 28.—The market continued active to-day and showed the continuance of a strong undertone by the way it continued to absorb liquidation, or fresh hedging sales. Liverpool did not fully respond to our further advance of late yesterday, after the close of that market. To have done so, the market there should have sustained an advance of 2½ to 4 English points, but it closed unchanged to a point lower. This and the fact that prices here have made such a sharp advance as 70 to 20 points the past week induced rather general profit-taking.

Open. High. Low. Close.
